DECLARATION

Management decision to change the notified body for the ISO 9001/14001 recertification process: Impact for the validity period of certificates

On behalf of Air Liquide Benelux Industries, represented by Ann Diels, Management Systems and Product Compliance Manager

Hereby, Air Liquide declare that:

- In February 2026, Air Liquide was required to change the notified body for the upcoming ISO 9001/14001 recertification process.
- As a result, there will be no overlap period between the new ISO 9001/14001 certificates and the existing certificates, which expire on 22 May 2026.
- Air Liquide's ongoing recertification process with the new notified body ends on 8 July 2026.
- As of 8 July 2026 Air Liquide expects to receive the new, updated certificates which will be communicated thereafter, and as soon as possible.
