Scope

On behalf of the ALBI IM entities, Vinçotte performed a claim verification of gaseous hydrogen labelled "Verified Hydrogen"¹ and sold by ALBI IM entities in 2025.

The verification was performed according to the requirements set out in the Claim Protocol validation report² and the Verification Protocol Report³. The Claim Protocol and the Verification protocol were developed according to the ISO 14020:2022 "Environmental statements and programmes for products – Principles and general requirements" and ISO 14021:2016 "Environmental labels and declarations – Self-declared environmental claims (Type II environmental labelling)".

Declaration of independence

The verification was carried out by Vinçotte as an independent third party.

Conclusion

Based on the work undertaken, it is the conclusion of Vinçotte that:

- An equivalent quantity of renewable electricity generated in the Benelux is procured (as demonstrated by the cancellation of the relevant Guarantees of Origin) for the quantity needed for the production of aforementioned sourced product and for the electricity needed for temporary storage and compression on the production;
- The CO2 emissions generated by the transport of the product to the customers are accounted for by purchasing an equivalent amount of Verified Emission Reductions;
